Line a day weather observation journal

How to use

1st

Use the following pages to collect one years worth of weather observations by recording what you observe about the weather on the day of the month listed on the top right corner of each page. You'll revisit the pages once a month in order by the listed date and record your weather observations in 1-2 sentences. At the end of the year, compare the weather you observed on each day month to month to get a better understanding of the changing weather in your area.
